

Dimmer recommendation list

Our dimmer recommendations are non-binding. Both special LED dimmers and dimmers, which are intended for incandescent lamps, high voltage halogen lamps and Tronic transformers with halogen lamps, are tested. With both dimmer versions - mentioned in our list below - perfect results are possible. In the event that you already own a dimmer, we recommend that you test it. System-related problems (current fluctuations, etc.) can have an impact upon the dimmer behaviour and slight humming noises may occur. Please ensure that you read the dimmer operating instructions in all circumstances.

As a result of external influences, it may be the case that a dimmer/LED combination does not function. We therefore make no guarantee or warranty that a specific dimmer/LED light combination will function in all circumstances nor do we assume any liability for damage that may occur as a result. Our dimmer recommendations are non-binding.

D Depending on the lighting product, the lighting can be controled via a button, touch sensor, gesture control or by tipping. Additionally there is Zigbee integrated in QUAD and FLAVOR.

If you want more than to just control your lighting, there is a very good Smart Home solution available that is based on the ZigBee radio standard. ZigBee is hereby deemed to be the most important standard and provides a wireless communication between a Smart Media device and the existing home technology. For lights marked with this symbol a ZigBee module can be ordered optionally as accessory. With an installed ZigBee module, it is possible to control the lighting by voice control without difficulty. The following are just some of the systems that are supported: Philips Hue, Amazon Alexa, Google Home, Apple HomeKit.

For lights marked with this symbol a dimmer (Casambi module) can be ordered optionally as accessory which permits the light to be dimmed via the normal switch and/or via an App (Casambi) by means of smartphone or tablet.

Depending on the actual installation environment, slight flickering may occur when dimming with the Casambi /Zigbee module in the lowest brightness range. As with the classic flushmounted dimmers, you should in such case increase the brightness manually.

* Lights with switch module can be equipped with a dimmer (Casambi/ZigBee module) and can be dimmed via smartphone or tablet. Dimming via the normal light switch is not possible.

X¹ Depending on the lighting product the integrated dimmer can be operated via a button or touch sensor.
